## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to an apparatus, classified in class 156 , subclass 345.1.
  - II. Claims 18-33, drawn to a method, classified in class 134, subclass 1.2.
  - III. Claims 34-46, drawn to a method, classified in class 134, subclass 1.2.
  - IV. Claims 47-50, drawn to a method, classified in class 134, subclass 1.2.
  - V. Claims 51-59, drawn to a method, classified in class 438, subclass 758.
  - VI. Claims 60-70, drawn to a method, classified in class 134, subclass 1.2.
  - VII. Claims 71-76, drawn to a method, classified in class 134, subclass 1.2.
  - VIII. Claims 77-85, drawn to a method, classified in class 134, subclass 1.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups II-VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are not disclosed as capable of use together and they have different modes of operation and different functions.

Art Unit: 1746

The invention of Group II requires a specific pressure, which is not required by any other group.

The invention of Group III requires two separate plasma steps, which is not required by any other group.

The invention of Group IV requires accelerating ions in a specific direction, which is not required by any other group.

The invention of Group V requires deposition of a polymer protective layer, which is not required by any other group.

The invention of Groups VI-VIII require presence low-k dielectric material, which is different for every group. The presence of this material is not required by any other group.

3. Inventions of Group I and Groups II-VIII are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as deposition of silicon, silicon oxide, conductors and other materials or for etching silicon, silicon oxide or metal layers on substrates .

4. Because these inventions are distinct for the reasons given above and the search required for any of Groups I-VIII is not required for any other Group, restriction for examination purposes as indicated is proper.

Art Unit: 1746

5. A telephone call was made to Michael J. Murphy on 9/11/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

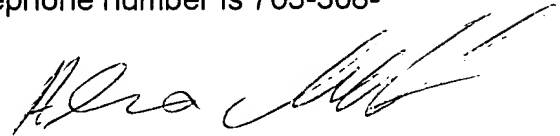

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 703-308-7545. The examiner can normally be reached on Monday - Friday 8:30 - 6:00.
